

## **Assistance in requesting a manufacturer code**

### **Rules for allocation**

1. In principle, the Office allocates only one manufacturer code per organization.
2. Providers are responsible for allocation and management of each internal code.

### **References to standards**

Allocation of manufacturer codes is based on ITU-T Recommendation T.35.

### **Structure of the manufacturer code**

The manufacturer code consists of three parts:

1. the country code (1 octet). The ITU-T, which is the competent body for the allocation of country codes, has allocated the following binary code to Switzerland: 1 0 1 0 0 1 1 0.
2. the manufacturer code (1 octet)
3. the provider's internal code (1 octet)
